FINAL CLOSURE OF THE "NEW SANITARY LANDFILL" - TJH-002-03

Dear Sirs:

This is to notify your agency that in accordance with CDPHE regulations, 6 CCR 1007-2, Part 258, Section 3.5.8, the Rocky Flats Environmental Technology Site has completed final closure of the "new sanitary landfill," that was never used. The landfill cell was located in the northwest quadrant of the Site.

This letter is to certify that the closure activities were conducted consistent with the approved Closure Plan for the New Sanitary Landfill, dated October 9, 2002. The closure consisted of removing/recycling the tires that held the UV liner in place, removing the entire synthetic liner from the bottom edge of the cell to the top of the cell, and auguring the clay liners and filling them with sand to render them incapable of retaining water. Additionally, all structural material within three feet of the existing grade was removed, and pipelines below three feet were grouted to disrupt a flow path. The areas were subsequently backfilled with the dirt that had been bermed in the area and reseeded.

The Site will implement post-closure requirements of monitoring the area for subsidence, erosion, seeding quality, and ponding over the next two years.

If you have questions or require additional information, please contact Steve Nesta at (303) 966-6386.

Sincerely,

Timothy J. Humiston 6/17/03

Timothy J. Humiston, PE
